

EdSmart + DIGISTORM

Reduce pathways - communicate directly with your parents

How the EdSmart + Digistorm integration works

EdSmart's seamless integration with Digistorm Mobile App means that functionality – such as notifications and all types of forms, including those requiring signatures and permissions – is delivered straight into the hands of your school's parents.

Within the Digistorm App, EdSmart appears as a menu option. When a parent clicks through to EdSmart, they are greeted with a list of their children attending your school. The numbers beside the children's names highlight outstanding forms that have been sent to them for completion but have not been returned. Any forms in red indicate urgent attention is required, while forms in green have been replied to, but are still listed for reference.

Features of EdSmart + Digistorm

For schools:

- A streamlined and sophisticated user experience for your school's community.
- Automated tracking of delivery, opening and response rates for messages.
- An up-to-date, complete history of student absences whenever you need it.
- The ability to schedule absentee notification times and recurring reminders to ensure parents respond promptly.
- Automation and workflows that significantly reduce administration labour.
- Push notifications, similar to EdSmart's email and SMS functionality, can be sent to remind parents and follow-up recipients that have not replied to forms.

"The integration between EdSmart, Schoolbox and Digistorm happens so seamlessly that I forget about it. That, to me, is the real telling of a system that works!"

Katrina Barracu
Executive Assistant and
Daily Planner
Launceston Christian School

The EdSmart and Digistorm App integration supports your school's need for an effective absentee process, that delivers a user-friendly parent experience without compromising on compliance.

EdSmart + DIGISTORM

Features of EdSmart + Digistorm

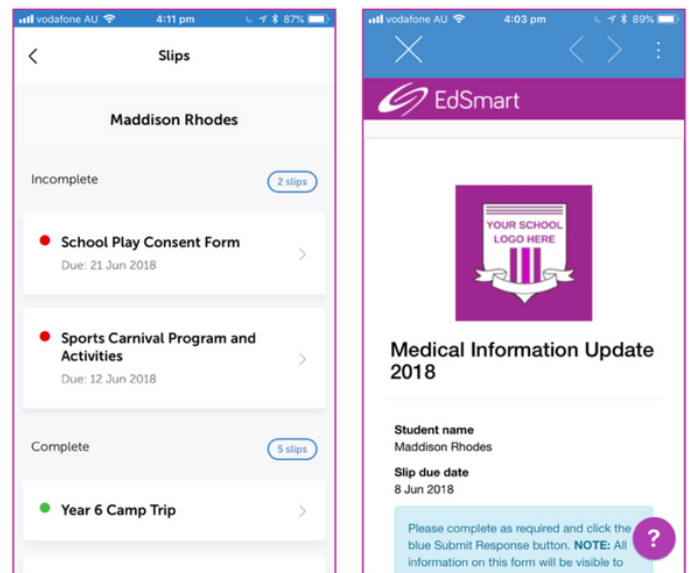

For Parents:

- The convenience of an app – straight to 'palm', ease of response (eg. just a click or two).
- Forms clearly aggregated in one place, both outstanding and completed.
- A clear, concise and gratifying user experience that turns a task into something far more pleasurable.

Being able to quickly approve or decline a permission note or slip in just a few taps, while still ensuring full compliance, is so powerful!

Our seamless integration offers K-12 schools a plug-and-play solution with easy implementation.

"Our parents love the immediacy of EdSmart and we now average between 95% and 97% response rate within a week of sending out a notice. The last few stragglers will be because they haven't updated their email address with the school or they are away on a family holiday. Lost paperwork is almost unheard of now, but if a parent has accidentally deleted a slip it is very simple to resend it." Burnside Primary, South Australia

EdSmart

EdSmart is a cloud-based software-as-a-service platform. At its heart, it's a digital forms, workflow and best practice process automation solution, specifically designed for K12 schools. With EdSmart, schools minimise manual effort and deliver greater efficiency and faster outcomes.

Digistorm

Founded in 2011, Digistorm develops custom apps, websites and admissions management systems that help K-12 schools solve complex problems, and reach their unique goals.
