

A refined, personalised digital experience for your parents

How the EdSmart + Schoolbox integration works

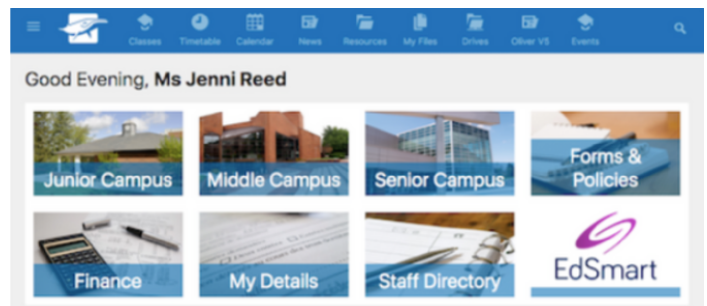

EdSmart's deep integration with learning management system Schoolbox is elegantly synchronised and easy to use, delivering an effortless one-stop shop user experience for parents and guardians.

All parents need to do to access the features and functionality of both technologies is log into Schoolbox via single sign-on, eliminating the need for multiple usernames and passwords. From their own personalised Schoolbox dashboard, they simply click on the EdSmart icon to see all communications and make sure they're up-to-date with permission and correspondence requirements for their child.

This integration results in a more clearly organised and enjoyable process for the two-way communication 'traffic' between schools and their parent community.

Features of EdSmart + Schoolbox

- Outstanding forms are immediately highlighted for parents as soon as they enter, so they can click straight through and complete them quicksmart
- A 'Managing existing forms' tab provides an aggregated view of all EdSmart communications, whether forms or one-way broadcasts.
- Information in previous forms can be accessed (e.g. referring to maps or checking packing lists for camp, etc).
- An optional tab for care information (at the school's discretion) details what medical and health information is being held on file for the child, as extracted from the school's student management system.
- For those schools on the Transform tier, self-service forms can be made available to parents, which allows them to generate their own forms that flow through the school (such as change of address details, change of medical details, etc.) acknowledged with an automated reply.

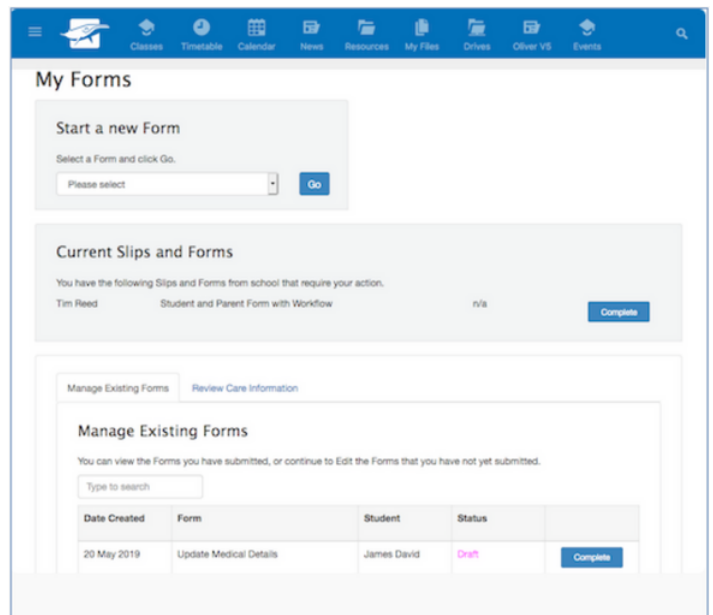

"The integration between EdSmart, Schoolbox and Digistorm happens so seamlessly that I forget about it. That, to me, is the real telling of a system that works!"

EdSmart + schoolbox

Elevate your parent experience

- Automated tracking of delivery, opening and response rates for messages.
- An up-to-date, complete history of student absences whenever you need it.
- The ability to schedule absentee notification times and recurring reminders to ensure parents respond promptly.
- Self-service information updates to significantly reduce administration labour.
- An easier, more satisfying way to exchange information and ensure compliance with parents and guardians.

This is just the beginning of an integration that will go deeper as Edsmart and Schoolbox collaborate further and explore possibilities for bringing their mutual technologies together.

EdSmart

EdSmart is a cloud-based software-as-a-service platform. At its heart, it's a digital forms, workflow and best practice process automation solution, specifically designed for K12 schools. With EdSmart, schools minimise manual effort and deliver greater efficiency and faster outcomes.

Schoolbox

Schoolbox technology transforms K-12 schools and is a virtual learning environment (VLE) comprising a unique all-in-one learning management system (LMS), portal and intranet. Schoolbox is self or cloud-hosted, totally integrated, flexible and secure with 402,000+ users and 523+ campuses sharing, teaching and learning online with confidence.
